

# Notice of CIG Media Group's Compliance with the NIH Public Access Policy

October 10, 2008

For all papers accepted on or after April 7, 2008 that report research supported by any funds or grants from the National Institutes of Health (NIH), CIG Media Group, LP (CIG) will assume responsibility for depositing the final published version of the manuscript to PubMed Central, as a service to our authors.

CIG will not implement any author fees to cover these services.

Authors should not submit their unedited accepted manuscripts to the PubMed Central archive as instructed by the NIH Public Access Policy (NOT-OD-08-033); instead CIG will provide a copy of the final, published article to the NIH to be made available for public access by PubMed Central 12 months after the date of publication. Hereby CIG will fulfill the authors' obligation and meet the deposit requirement of NIH.

CIG reserves the right to change or rescind this policy. CIG's copyright transfer agreements are compliant with the NIH Public Access Policy and are not superseded or altered by the NIH's policy.

For any questions regarding CIG's policy or our submission process, please contact Maya Crawford at 214-367-3347 or [maya.crawford@cigjournals.com](mailto:maya.crawford@cigjournals.com). You will also find a copy of our policy on our Web site at [www.cigjournals.com](http://www.cigjournals.com).

For more information on the NIH Public Access Policy, please go to <http://publicaccess.nih.gov>.

## *About CIG Media Group, LP*

Dallas-based CIG Media Group, LP is a subsidiary of Medical Media Holdings, LLC. Founded in 1996, CIG Media Group, LP is the premier publisher of seven peer-reviewed, tumor-specific medical oncology journals: *Clinical Lung Cancer*, *Clinical Colorectal Cancer*, *Clinical Breast Cancer*, *Clinical Lymphoma & Myeloma*, *Clinical Leukemia*, *Clinical Genitourinary Cancer*, and *Clinical Ovarian Cancer*. All of the company's established journals are indexed in PubMed. Each year, CIG Media Group, LP also publishes multiple tumor-specific journal supplements that provide oncology professionals with opportunities to earn American Medical Association-accredited continuing medical education credits. For more information about CIG Media Group, LP, and our clinical oncology journals please visit [www.cigjournals.com](http://www.cigjournals.com).
